These roots are fastened

to a frame made of sphagnum moss, which retains the moisture, so that an occasional dipping into a pail of water is all that is required to keep the plants in a good growing condition. As we have found the ball-shaped forms to give the best results, as well as being the most artistic in appearance, we only offer this shape. Price, 75 cents each.

Vegetable Plants.

We have twenty acres in garden, therefore we make a specialty of raising vegetable plants, raising, setting and shipping hundreds of thousands of plants annually. We ship large quantities of plants to distant states and territories. Our system of packing is so complete that we rarely ever have any plants damaged. All vegetable plants sent out by us are raised from the same seed that we use ourselves; in fact we do not offer any plants for sale that we do not set out large quantities from the same beds in our own garden. All plants are raised from the best of seeds, regardless of cost of seeds. Early cabbage should be set out in April—the sooner the better; second early, about May 1st; late cabbage from May to the last of July.

Cabbage Plants.

✓ *Early Jersey Wakefield*—This is, without doubt, the best early cabbage grown. The variety we use for early planting; every plant forming a large, solid head. Strong, stalky plants ready April 1st. Per 100, 50 cents; per 1000, \$4.00; after May 1st, at 30 cents per 100; per 1000, \$2.00.

✓ *All Season*—This excellent strain of early Drum Head cabbage is as early and good as the Early Summer, and growing a third to half as large again. As the name indicates, it can be planted at all seasons, and makes both a splendid early and late variety. It forms a fine, large head of superior variety, not bursting after heading. Strong plants ready April 1st; per 100, 50 cents; per 1000, \$4.00; after May 1st, per 100, 30 cents; per 1000, \$2.00.

✓ *Henderson's Summer*—For second planting we have never found any superior to this. It stands the hot sun well and usually forms large, solid heads of fine flavor. Good, stalky plants on and after May 1st, 30 cents per 100; per 1000, \$2.00.

✓ *Premium Late Flat Dutch*—(Late). There may be other varieties of late cabbage just as good as this; still, in our fifteen years' experience in market gardening we have found none that we considered any better; plants ready from May 1st to July 10th; per 100, 25 cents; per 1000, \$1.75.

✓ *The Plant Seed Company's St. Louis Late Market Cabbage*—Is the finest and best late cabbage ever put on the market; it is different from all other varieties we know of, it is a special strain, entirely distinct and an excellent keeper. Celery.

✓ *Giant Pascal*—The latest and best variety of celery. It is a selection from the Golden Self-Blanching, and adds to the general good qualities of its parent, good keeping qualities. The stalks are very large, thick, solid, crisp and of a rich, nutty flavor, free from all trace of bitterness. Price, 40 cents per 100.

✓ *White Plume*—Each year adds to the popularity and value of this variety. It requires very little earthing up to blanch it; as a celery for fall and early winter use it is unsurpassed. Price, 40 cents per 100.

Strawberries--When to Plant.

By all means in the spring; never late in the fall. Sometimes they do very well set out in July or August, but do better in spring. As soon as the ground can be worked, get the ground in fine condition; plant the rows three feet apart and the plants eighteen inches apart; give thorough cultivation, and do not let them get too thick—keep part of the runners cut off, at least.

Those marked (P) have pistilate or imperfect blossoms and must be planted near some variety with perfect blossoms to fruit them. Those marked (B) are bisexual or perfect blossom, and will do well by themselves.

Send your orders early, as your plants will do better if set out early.
